

# High Capacity Kraken® Filter

## NJDEP Certified Membrane Filtration System

The High Capacity Kraken Filter is a stormwater treatment system utilizing advanced membrane filtration, ensuring a high level of removal of total suspended solids (TSS), nutrients, metals, and trash.

The High Capacity Kraken Filter has a built-in pretreatment chamber and integrated internal bypass. It is specially constructed to meet design and performance standards of the New Jersey Department of Environmental Protection (NJDEP).

## High Capacity Kraken® Filter Advantages

- The most efficient NJDEP certified membrane filter
- Treats double the flow of the previous Kraken approval at 17 gpm per 30" tall cartridge to meet 80% TSS removal
- Compact footprint reduces installation costs
- Available in vault or manhole configurations
- Offline configuration allows for increased bypass capacity and eliminates the need for a separate bypass structure
